**PROJE TANIMI**

**The main aim of this project is to increase the knowledge of students and teachers about the Web2 tools that can be used in math lessons to increase the motivation and success of students. Traditional methods make students be bored in the lessons. Digital tools should be integrated to math lessons to prevent students be bored and make lessons enjoyable and attractive. Web2 tools also reduces paper waste and paper work. So let's start to learn some of them!))**
